Focus of MACC

The Multi-Agency Craft Conference (MACC) is an annual event spanning three days focused on open dialog between DoD, other government agencies and the maritime community on common issues unique to boats and craft. MACC2006 will be concentrated on examining operational capabilities and tactics that maintain and prepare the U.S. Armed Forces missions and personnel in warfare theater and homeland security.

Objectives

Current and future mission requirements for homeland security, force protection, littoral warfare, riverine warfare, and limited conflict missions place vital emphasis on boats and watercraft. For this reason, the objectives of MACC2006 are to:

-Inform participants of lessons learned during training missions and in the warfare theater affecting the operational readiness, reliability and resources of combatant and service craft.

-Present on-going operational needs and the associated technological initiatives within Government and industry that may provide solutions for these needs.

Call For Technical Presentations

We need experienced professionals to provide technical presentations during MACC. Presentations should be applicable to this year's theme, "Operations: Tactics and Capabilities." It is anticipated that there will be technical presentations representing organizations of the U.S. Army, U.S. Marine Corps, U.S. Navy, U.S. Coast Guard, U.S. Special Operations Command, and industry.

This is an excellent opportunity to see first-hand and hear directly from many government and industry colleagues about their outstanding work in the area of craft operations.

Please contact the Presentations Coordinator if you are interested. Every attempt will be made to accommodate your schedule requests.

Points of Contact

Registration/General Information .....
757-675-9422 or 757-462-3862
Exhibits..... 757-462-3212
Presentations .....
757-462-3281 or 757-462-7019
In-water Boat Demo 757-462-3289
Overall Coordinator 757-462-4114

9th Annual Multi-Agency Craft Conference

FOCUS

"Operations: Tactics and Capabilities"

6-8 June 2006
Naval Amphibious Base Little Creek
Norfolk, VA

What MACC Offers

*Keynote Speakers

*Discussion Panels

*Concurrent technical presentations by government and industry experts so participants can choose topics of interest

*In-water demonstrations of new and advanced watercraft technology

*Static displays of craft and associated systems

*Opportunity for networking and enhancing communication in an informal social atmosphere

Who Should Attend

*U.S. Department of Homeland Security

*U.S. Army, Navy, Air Force, Marines, Coast Guard, and SOCOM

*U.S. Customs

*Department of Defense

*ONR

*Federal and State Intelligence Agencies

*State and Local Police

*Municipal Water Operators

*Port Authorities

*Boats and Craft and Associated Systems Manufacturers

*Combat Life Saving Equipment Manufacturers

*Marine Consultants
